

ENERGY MANAGEMENT SYSTEM POLICY

VitrA Tiles Company as an organization aware of its duties towards the society; the Sustainable Development approach has been adopted, which focuses on meeting the needs of today's and future generations without endangering them.

In line with this approach;

- To continuously improve our energy performance and energy management system in our entire factory
- To make sustainable production with continuous development and improvements in energy efficiency
- To comply with the legal and other conditions which are obliged to comply with energy use, consumption and efficiency,
- To support design and supply activities that take into consideration improvement of our energy performance
- To provide all necessary information and resources for determining, realizing, and reviewing energy goals and targets,
- To raise energy awareness of our employees,
- To carry out all the necessary studies by managing all our activities together with our management systems to increase the awareness of employees and the society on natural resource consumption and energy efficiency,

accepted as our duty.
